I am selling my Miller 330A BP TIG ARC welder complete with cart, cables, water cooler, torch, and foot pedal. It works great and has made lots of money welding aluminum and MIG. Fast shipping is available, and I can provide access to parts and manuals. If you are interested, please call John at 952-933-6755. The welder is a single-phase, 120/240/480V machine, but it comes with a water cooler. It is in excellent condition and was used for aluminum welding. If you want to learn more about the welder or have questions, please don't hesitate to contact me.
pedal local pick up only this is a beautiful condition machine with tremendous capability, miller 330a bp s instant current ac dc welding power supply tig mig stick arc comes with leads and foot control price 1000 obo do not contact me with unsolicited services or offers, manuals amp parts find replacement parts and get the most from your miller products by downloading the specific owner s manual for your unit from safety precautions operations setup information and maintenance to troubleshooting and parts lists miller s manuals provide detailed answers to your product questions, miller dialarc 250 ac dc dialarc hf gold star 330 a bp and 320 a bp ssc does not make a pedal that replaces the rfc 23a which uses a 15 ohm 130 watt rheostat our design like that of most welding pedals made today uses a 2 watt high resolution rotary potentiometer for the weld current control we suggest buying the rfc 23a from your, your bid or registration is pending approval with the auctioneer please check your email account for more details, lot 15 miller 330 a bp la tig welder description miller 330 a bp la tig welder foot pedal touch location spondon engineering 78 nottingham rd derby de21 7nl the purchaser shall at its own costs be responsible for disconnecting dismantling and removing items purchased from the auction location if the purchaser is intending to export items purchased at the auction it shall be, i have only used a miller mig for welding a 35s i just picked up an almost free miller 330 bp tig 5 300 amp this is a huge machine at 850 pounds i just picked up an almost free miller 330 bp tig 5 300 amp this is a huge machine at 850 pounds, hello i ve had a miller 330 a bp for about a year and i ve been happy with it however today i had ran a few outside corner welds i was working to start another weld when it seemed like only the high frequency portion of the arc was getting through, miller welder model 330a bp ac dc electric welder some rust operable note please inspect items prior to placing a bid inspections are by appointment only, miller 330 bp high frequency welder i have a miller 330 bp high frequency electric welding machine that i used for aluminum and tig mig and stick machine works great made lots of money welding aluminum, miller welder 330a bp it will not weld in d c straight or reverse no ark but will work in a c its like there is very low volts i was welding and then could not strike a ark it s likely that your pedal is the problem pull the cover and check it electrically these have been problematic in the past you can further troubleshoot by selecting, when i called tech support about my 330 they emailed me the technical manual which is much more informative and specific than the basic owners manual that is on the website here give tech a call they are great guys, re miller 330 a bp by ejpoter thu mar 13 2014 3 33 am thanks i have tiged a little but those machines were already set up and my previous setup was a miller 250 dial arc with a 17 air cooled touch so setup is new, having issues with my 330a bp on the low and medium amp range dc stick i can weld ok on the high amp range setting on dc stick i can t start a weld in either low or medium dc stick, the miller unit is very weak and it seems to work only intermittently i talked to miller and they said that even the kind of coolant in the torch can make it not work i talked to miller and they said that even the kind of coolant in the torch can make it not work, re miller 330 a bp by ejpoter mon mar 24 2014 10 04 pm i think you misunderstood my post i have had a 250 dialarc for a long time and love it but i ve been wanting a tig welder the one i have been looking for i just bought a couple of weeks ago and bought a new stick lead for it it didn t have a stick lead i love the welder it has, hello i ve had a miller 330 a bp for about a year and i ve been happy with it however today i had ran a few outside corner welds i was working to start another weld when it seemed like only the high frequency portion of the arc was getting through, a miller 330 a bp is rated to use 105 or 110 amps at max draw on standard 220 single phase power i put mine on a 100 amp breaker and have had no problems as far as the massive amount of excessive power draw i don t see it either i don t use mine enough or the story isn t right, miller 330 a bp tig arc ac dc welding power sources these are heavy duty power sources that can tig weld as well as arc weld in a c there are three ranges 5 45 20 215 or 135 435 for dc there are three ranges 5 50 15 260 or 180 460 there is also a selector for reverse polarity ac and straight polarity each unit is mounted on wheels with a
